HDSDI Dual Screen 8.4-Inch Basic Monitor

V-R82DP-HDSDI

Our budget model, TFT-MegaPixelT V-R82DP-HDSDI, has Hyper Process motion interpolation for interlace images and is a direct replacement for 8 and 9-inch CRTs. Ready to rack mount in 4RU, this cost effective model saves valuable rack space, in addition to its low weight and power consumption when compared to similar CRT products.

Input is provided for a single HDSDI/SDI (High Definition Serial Digital Interface), with any format and frame rate on each of the screens. Image processing maintains digital integrity from signal input right through to the pixels. All screen formats are scaled to fit on screen in the highest resolution using our proprietary program and state of the art LSI with CRT Color Match conversion to emulate SMPTE-C phosphor of a CRT.
